🪪 PROFILE

Fifth-year student pursuing a degree in software engineering, passionate about technology and web development. Currently seeking an internship for my final year project (PFE).

{} PROGRAMMING LANGUAGES

`JAVA` `C++` `C#` `PHP`

`HTML` `C++`

</> FRAMEWORKS

`Spring Boot` `Angular`

`Symfony`

🔑 DATABASES

`MySQL` `PostgreSQL`

`MongoDB`

🌐 LANGUAGES

`Arabic` `French` `English`

🔧 OTHER TOOLS

`Keycloak` `Maven` `Git`

`IntelliJ IDEA` `Visual Studio Code`

🎓 EDUCATION

3rd Year of Engineering Program, Software Engineering Specialization, Esprit
2020 – present | tunis, Tunisia

First Year of Integrated Preparatory Program, Sesame University
2018 – 2019 | tunis, Tunisia

Bachelor's degree in experimental sciences, High School Wafa
2017 – 2018 | Ghazela, Tunisia

📁 PROJECTS

CI/CD DevOps Project
09/2023 – present
- Managing the Spring Boot application with Maven.
- Code quality checks through SonarQube and integration of unit tests with JUnit.
- Continuous delivery setup with Docker, Jenkins, and Nexus.
Technologies Used: Maven, SonarQube, JUnit, Docker, Jenkins, and Nexus.

Freelance Project: "Fassarly" Education Resource Platform for School Students
2023 – present
Developing an interactive online learning platform aimed at supporting both elementary and high school students in accessing educational content. The platform is designed to provide a rich repository of resources, including video lessons, PDF materials, and supplementary learning materials.
Technologies Used : Spring Boot, Angular, and Bootstrap

Development Project: Event Platform
09/2023 – 11/2023
- Design and development of a microservices architecture.
- Integration of social login with Google and Facebook.
- Real-time chat implementation with WebSocket.
- Creation of a user management system and their profiles.
- Dockerization of microservices.

Technologies Used: Spring Boot, Spring Security, Docker Hub, Angular, MySQL, Bootstrap

Development Project: International Mobility
02/2023 – 06/2023
- Design of a microservices architecture.
- Implementation of authentication and registration with Keycloak.
- Development of a user management module.
- Integration of Stripe for online payments.
Technologies Used: Spring Boot, Angular, Keycloak, MySQL, Bootstrap

Freelance Project: Creation of an e-commerce platform specializing in furniture and interior furnishings for "Meuble C Design."
07/2022 – 09/2022
Technologies Used: PHP,Symfony,CSS,Bootstrap

💼 PROFESSIONAL EXPERIENCE

KC-Legal, Remote Software Engineering Internship ⧉
07/2023 – 09/2023 | Montréal, Canada
Design and development of "Curiam" application for managing the accounting of law firms, office subscriptions, and orderly client file management.
Technologies Used: Spring Boot, Angular, Spring Security, MySQL, Bootstrap

CERT, Internship in a Business Environment ⧉
06/2022 – 08/2022 | tunis, Tunisia
